

EP-A380 Mini Air Purifier

1. Ultra-low power CCFL UV lamp with low dosage ozone, makes 24 hours disinfection possible.
2. Negative ion included. Remove cigarette smog and particulate pollution in less than 10mins.
3. With the ozone, the disinfection and removal of odor and bad smells become more powerful.
4. No additional parts or parts to be abandoned, no extra-paid is needed once to be used
5. Ultra-low power consumption, one complete charge can last more than 1 hours.
6. Pocket-size, Ultra-slim and light-weight design, make the purifier portable and easy to carry everywhere.
7. Different charging sources are available- socket power, car-power, USB power from computer and even solar power.
8. Elegant design, it is even better than a decoration purpose
